TTR 16KD-3 US

TOURING RACK

Description

TTR 16KD-3 Rack is a rugged flight case on wheels, designed to house the essential electronics required to power TT+ GTX and GTS line array and subwoofer systems. The 11U Rack features an internal suspended cage, sliding doors, four pivoting wheels, and two handles on each side for enhanced mobility and accessibility. Designed for touring and installed sound applications, this rack ensures secure equipment mounting, efficient cable management, and easy transport in demanding professional audio environments. It includes three XPS 16KD (Dante version) power amplifiers, a PD 30A US power distributor for the 100-120V areas, and an SD 6/4 input box for efficient signal management. All components are pre-wired for immediate “plug and play” operation, ensuring a streamlined setup and reliable performance in demanding audio environments.

Features

› S-COM Signal Connections
› P-COM Power Connections
› Signal management panel for 6 analog I/O and 4 AES/EBU I/O
› AC INPUT for US (100-120V)
› 11 RU Durable Flight Case
