AP1

SINGLE AMPLIFIER PANEL

Description

The TT+ AP1 rack panel is specifically designed to efficiently connect a single amplifier inside a dedicated 3-unit rack, ensuring all necessary signal, power, and speaker connections are easily accessible and organized within this form factor. This setup provides a streamlined and professional solution for managing complex audio systems while saving space and maintaining a clean installation in professional environments.

Features

- P-COM 8-pin to 4 SpeakON NL4 connectors for A-B, B, C-D, D amp out channels
- 2 flying NL4s on the back of the panel for easy amp connections
- 4 XLR female front connectors for analog and AES/EBU inputs
- 4 flying XLR male cables on the back for amplifier's inputs
- 3 feed-through EtherCON connectors for control and audio networking
- 32A front power connector with dedicated 32A power cord for high-current connection
- 1RU Rackmount
